## Introduction

## Place value: Represent

and block in which that objective is first met in version 3 of the White Rose Maths schemes.

The ready-to-progress criteria are split into strands:

Many schools are using the 'Ready to progress' criteria produced by the DfE as part of their assessments of pupils' learning. This document also lists the key steps in the White Rose Maths schemes of learning that support each of the 'Ready to progress' criteria, in the same sections as the national curriculum objectives. In many cases, the criteria are also addressed in other steps and in other blocks, for example looking at addition and subtraction in the context of measures. We have not listed every single instance as this would become unwieldly.

## These are the NC

 objectives. In our schemesSo far, we have added the Autumn steps from the new schemes. We will update this document when the Spring and Summer steps are released.
